

PEERPoint — Admin How-To

This guide is for program administrators who invite Peer Support Members, manage On Call, oversee the request queue, and review reports on PEERPoint.

Admin site	https://admin.mypeerpoint.com
Member & staff site	https://mypeerpoint.com
Staff sign-in	https://mypeerpoint.com/staff
Invite setup	https://mypeerpoint.com/setup

Sign in (Admin)

- Open <https://admin.mypeerpoint.com>.
- Enter your Admin username and password, then click Sign in.
- The seed account is username Admin. Change the password under Account after first login.
- Your session lasts about 12 hours, or until you sign out or close the tab.

Invite a Peer Support Member

- Any Admin can invite Staff or Admin access. Admins automatically have staff queue rights.
- Under Members → Invite Peer Support Member, enter: First name, Last name, Bureau, Job title, Email, and Access (Staff or Admin).
- Click Send invite. Invitees receive an email with Finish registration and How-To download buttons.
- Always keep the invite link shown in the Admin site as a backup if email is delayed.
- The invitee finishes registration on /setup: username, password, sex (for matching), phones, and emails.
- Pending invites can be Resent or Revoked. Staff sign in at <https://mypeerpoint.com/staff>.

Manage accounts

- Disable / Enable blocks or restores sign-in (except the seed Admin account).
- Make Admin / Make Staff changes access level (except the seed Admin account).
- Set Male / Female on each account so immediate-contact matching works.
- Each user updates their own password under Account after login.

On Call schedule

- Open the On Call tab. Choose a day and start/end times.
- Admins can schedule any Peer Support Member from the roster; Staff can only add themselves.
- Before saving, the person being scheduled must acknowledge they are expected to be available during those times.

- Members requesting immediate chat/voice are matched to who is On Call now (Male/Female preference). Names are not shown to members.

Run the request queue

- Set Peer display name for assignments (your name or initials).
- Click Refresh to load new help requests (form, face-to-face, or immediate contact).
- For an open request: review contact info and notes → Assign + generate room code.
- Share the room code with the member. The app does not email the code automatically (except immediate-contact alerts to staff).
- Join Peer chat and/or Peer voice with the same room code.
- Add staff notes on the request as needed. If you are assigned, log actual time spent in minutes.
- When finished → Close the request → Sign out.

Content: Self Help, videos, and Resource Gallery

- Open the Content tab on the Admin site.
- Edit Self Help articles (title, category, body, related link). Paste a YouTube, Vimeo, or .mp4 link to embed a video for members.
- Publish or reset to built-in articles when needed.
- Add Resource Gallery items by uploading a file (max 8 MB) or pasting an external link. Members open these under Resources on the member site.
- Delete outdated gallery files from the same Content tab.

Reports

- Open the Reports tab on the Admin site.
- Review totals: open/assigned/closed requests and total minutes logged.
- See time spent by Peer Support Member, request notes, and On Call history (including availability acknowledgments).
- Use Refresh on the Reports tab after staff log notes or time.

What members see

- On <https://mypeerpoint.com>, members unlock the site with a Site use code, then use Request Help, Self Help, Peer chat, and Peer voice.
- Request Help includes employment attestation, bureau, civilian/sworn, and contact preferences.
- Immediate contact matches an On Call peer by sex preference and opens chat or voice with a room code.
- PEERPoint is peer support, not clinical care or emergency services.
- Crisis options stay visible: 988, 911, and the peer support line.

Troubleshooting

- Prefer <https://admin.mypeerpoint.com> for Admin sign-in.
- Staff cannot sign in on the Admin site → They must use <https://mypeerpoint.com/staff>.
- Invite email not received → Copy the invite link from the Admin site; check RESEND_API_KEY and INVITE_FROM_EMAIL.
- Invite expired → Resend or create a new invite (links expire in 7 days).
- Queue empty but a member says they submitted → Refresh; offline/local saves never appear in the queue.
- Member never got a room code → Codes are not emailed by the app — you must share them (except staff alerts for immediate contact).

Admin checklist

- Open <https://admin.mypeerpoint.com> and sign in with your Admin username.
- Change the seed Admin password after first login.
- Invite Staff/Admin; confirm they complete /setup and receive the How-To.
- Keep On Call coverage current with acknowledged availability.
- Assign/close requests; review Reports for notes and time spent.

Emergencies: 911 · Crisis: 988 · Peer line: 801-548-8002 · Email: slcosopeersupport@saltlakecounty.gov · IT: PEERPOINT_KV required; optional RESEND_API_KEY + INVITE_FROM_EMAIL
