

PEERPoint — Staff How-To

This guide is for Peer Support Members (Staff) who take On Call shifts, respond to help requests, add notes, and log time spent on PEERPoint.

Staff sign-in	https://mypeerpoint.com/staff
Member site	https://mypeerpoint.com
Invite setup	https://mypeerpoint.com/setup

Finish registration

- Open the Finish registration button from your invite email (or the backup link from Admin).
- Choose a username and password. Add phones, emails, current shift, and sex (Male/Female) for matching.
- After setup, sign in at <https://mypeerpoint.com/staff>. Do not use the Admin site unless you are an Admin.

Sign in

- Open <https://mypeerpoint.com/staff>.
- Enter your username and password.
- Your session lasts about 12 hours, or until you sign out or close the tab.
- Change your password anytime under the Account tab.

Add yourself to On Call

- Open the On Call tab.
- Your name is selected by default. Choose the day and start/end times you can cover.
- Check the acknowledgment that you are expected to be available during those times, then add the block.
- You can only schedule yourself. Admins can schedule other Peer Support Members if needed.
- When you are On Call and a member requests immediate contact matching your sex preference, you may get an alert email with a Join button and room code.

Respond to requests

- Open the Requests tab and click Refresh.
- Set Peer display name for assignments (your name or initials).
- For an open request: Assign + generate room code, then contact the member and share the code.
- Use Open Peer chat or Open Peer voice with that room code.
- Room codes expire after 5 hours with no chat/voice use; re-assign to issue a new code.
- Close the request when finished.

Notes and time spent

- On any request, add a staff note to record important follow-up details. Notes are visible to Staff and Admins.
- If a request is assigned to you, log actual time spent in minutes (optional short note).
- Only the assigned Peer Support Member (or an Admin) can log time on that request.
- Admins can see notes and time in the Reports tab.

What members experience

- Members unlock <https://mypeerpoint.com> with a Site use code (not an employee ID).
- They can request help (including face-to-face), use self-help resources, or request immediate chat/voice.
- PEERPoint is peer support, not clinical care or emergency services. Point members to 988 / 911 when needed.

Troubleshooting

- Cannot sign in on admin.mypeerpoint.com → Use <https://mypeerpoint.com/staff>.
- Invite expired → Ask an Admin to Resend the invite (links expire in 7 days).
- No On Call match for a member → Confirm your sex is set and you have an active On Call block.
- Cannot log time → Assign the request to yourself first (or ask Admin).

Staff checklist

- Complete /setup from your invite email and download this How-To.
- Sign in at <https://mypeerpoint.com/staff>.
- Add yourself to On Call for days/times you can cover (with acknowledgment).
- Refresh Requests; assign, chat/voice, add notes, log time, then close.
- Sign out when finished.
